# Longspan with Timber (MDF) Shelves

Shown as Starter and Add On Bay

A strong, durable and economical solution to your storage needs. Longspan Shelving with timber shelves is more than adequate for most applications.

Suitable for storing everything from small parts to long, heavy and bulky goods.

- Easy to assemble
- Comes complete with four (4) timber shelves per bay
- Shelves are fully adjustable
- Additional MDF shelves are available cut to exact size to suit all standard lengths and depths.

**Lengths:** 900mm, 1200mm, 1800mm, 2400mm

**Depths:** 450mm, 600mm, 900mm, 1200mm

**Load bearing capacity:** 375kg per shelf level.

# Longspan with Mesh Shelves

Shown as Starter and Add On Bay

Longspan Shelving with mesh shelves is the ultimate choice for archive storage and a wide range of other applications.

Mesh shelves are fully adjustable, minimise dust accumulation and allow a free circulation of air, greater visibility and light penetration.

- Easy to assemble
- Comes complete with four (4) mesh shelves per bay
- Shelves are fully adjustable
- Durable silver grey powder coat finish
- Mesh shelves suit Z Beams only

**Load bearing capacity:** 375kg per shelf level.

# Longspan with Steel Shelves

Shown as Starter and Add On Bay

For a smoother, crisp finish and long term durability, the choice is Longspan Shelving with Steel Shelves.

Suitable for storing everything from small parts through to long, heavy and bulky goods. Comes complete with 4 fully adjustable steel shelf levels per bay.

- Easy to assemble
- Comes complete with four (4) steel shelves per bay
- Shelves are fully adjustable
- Durable silver grey powder coat finish, with adequate supports on the underside

**Load bearing capacity:** 375kg per shelf level.

# ALSTOR Securaspan

---

Securaspan is a versatile system utilising ALSTOR Longspan for the security of any items that require safe storage. Securaspan is available in single stand alone bays or in complete adjoining runs with each bay being lockable and secure.

- 1800mmW x 450mm, 600mm or 900mmD x 2200mmH
- Available with MDF, Mesh or Steel shelves
- Adjustable beams in increments of 50mm
- Custom solutions available

## **Back Panel**

Rear back panel is internally fixed to the frame with a support bar welded into the centre of the panel for maximum strength.

## **Side Panel**

Side panels are a complete unit, with mesh welded into the internal frames of the Longspan for ease of assembly and added security.

## **Top Panel**

Top panel is internally fixed to the Longspan frame. A support bar is welded into the centre of the panel (900mm deep shelving only) for maximum strength.
